Explanations of vote:

Rapport Elisa Ferreira

Pino Arlacchi (S&D), in writing . – Dear Mr. President, I voted in favour of this report because it insists on the fact that the framework for preventing and correcting macroeconomic imbalances should complement a Union strategy for growth and jobs aimed at boosting the Union's competitiveness and social stability.

The text also clearly calls on the Commission to have a stronger and more independent role in the enhanced surveillance procedure, missions, recommendations and warnings.
